FastCheque
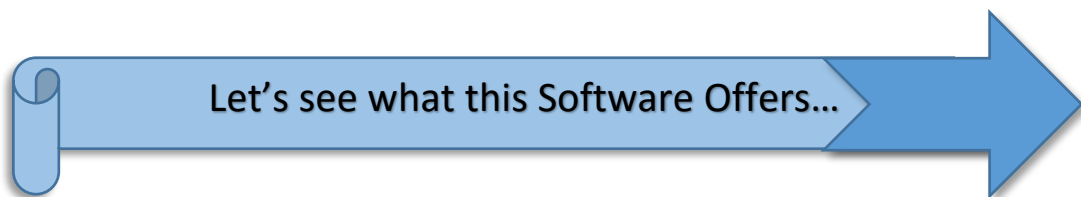

Cheque Printing Software

Simple & Easiest Way to

Print Cheques on Your Normal Cheque Book Leaves...

Let's see what this Software Offers...

FastCheque – A Cheque Printing Software

Main Benefits – *Why to Use this software for Printing Cheques!*

No More Mistakes

When handwriting, Amount written in numbers & written in words might be different, but in this case, you will enter amount in numbers and software will convert into words automatically. Once you will issue cheque to any party, FastCheque will save that name automatically to use in future.

Professional Impression

Printed Cheques puts positive impression on your Suppliers and banker when your cheques are presented to them, Printed Neat & Clean with no handwriting objection. Once you will start signing printed cheques, you will not like to issue handwritten cheques.

Maintain Records

All cheques detail is saved automatically when you print cheques through this software. You can generate reports in between any two dates, Bank wise, Party wise. You can customize reports to put your Company Logo etc. by yourself. You can print reports or export to excel or pdf file.

PDC Reminders

FastCheque reminds you about PDC cheques which are about to appear in bank for clearance as per cheque date. Every time you start the software, it welcomes you with the PDC reminder list which helps you to plan your financial flow more effectively.

FastCheque – A Cheque Printing Software

Main Features – *Utilization of this Cheque Printing Software!*

PRINT CHEQUES

On Normal Cheque Leafs   **On Any Printer**

Three Ways of Preparing & Printing Cheques!

Single Cheque Mode

Used in everyday life to print cheques. Simply select your bank from drop down, choose date, type amount in numbers and any remarks. Now tear the cheque leaf and put into printer, click print & have honor of printed cheques. You have tags to print like Account payee or Non-Negotiable etc.

Batch Cheque Mode

Bunch of PDC cheques for installment etc. can take a lot of valuable time. With this software, printing 100s of cheques will be few clicks. Type payee name, choose 1st cheque date, total cheques, interval by month/ days & click to prepare cheque list & print all.

Excel Import Mode

You can import cheque data from an Excel file. In few clicks, you can import hundreds of cheque data to FastCheque. Then Put bunch of Cheque leafs in printer and Click Print to get all of them printed. That's how you can print various cheques for different parties at a time

Payment Vouchers

FastCheque creates payment voucher automatically for each cheque by using details, you enter for printing cheque. Optionally, you may enter invoice details as well, if making cheque against various invoices. You can put your company logo etc. on the voucher.

Cheque Format Designer

The software has cheque designer to change the design of the cheque leaf. A user-friendly interface, where you can drag the fields to specify the position where the payee name, amount, date etc. has to be printed. All UAE cheques are pre-designed in this software.
